

Bonaverde Blackpaper

Roast, grind & brew

From fresh green beans to a tasty cup of black coffee
Our first model: BERLIN

Roasting, Grinding & Brewing

In One Machine.

Roasting

Coffee beans are like snowflakes - no two harvests are alike. Since every harvest requires different treatment to truly shine, one-size-fits all roaster settings mean some beans (and therefore some growers) can't join the revolution.

Brewing

Place your filter here after pouring green beans into the roasting drawer.

Grinding

We consulted with top baristas around the world to develop our five flavor-boosting grinder settings. Whatever your favorite setting, the meticulously calibrated high-alloy steel grinder always produces a consistent grind, for a flawless cup every time you brew.

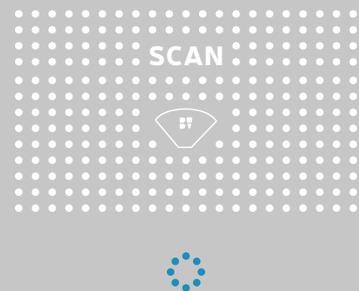

3G

Machine control

The machine is controlled by RFID tags on pouches containing the individual roasting profile for the beans being prepared.

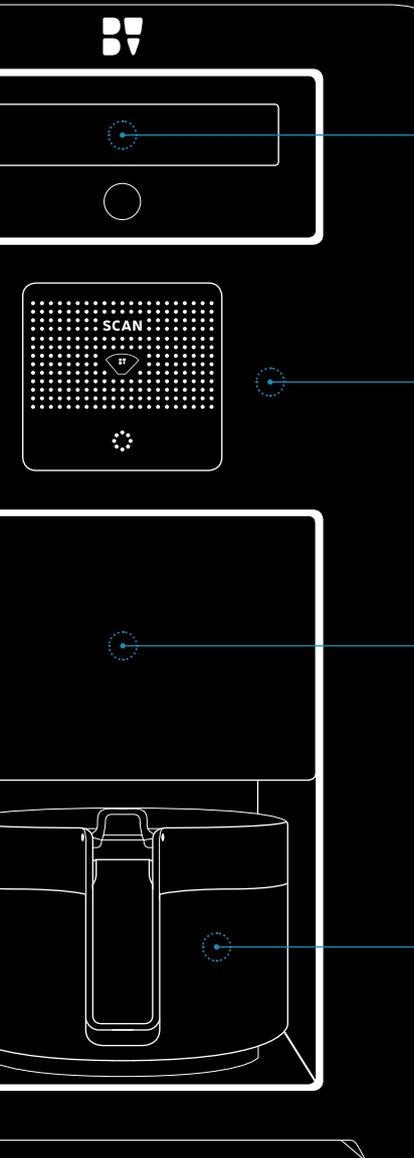

Water Tank

- 1.2 L / 40oz.
- Holds up to 5 cups of freshly roasted coffee
- With a dial behind the water tank, the grinding level can be manually adjusted.

Coffee Maker: Model Berlin

Technical Details

Coffee Beans

Roasted at about 340°C / 644°F while never getting hotter than 50°C / 122°F on the outside, the chamber roasts coffee beans to perfection.

Control Panel

An RFID chip transmits 100% accurate Roast-Grind-Brew profiles. No WiFi needed, works on free 3G cellular network. Scan the coffee pouch and starts the process using the Control Panel.

Coffee Filter

100% renewable, recyclable bio-degradable material. The coffee filter also functions as the bean packaging.

Fresh Coffee

Process time depends on the roasting profile, generally in 15-20 minutes you have a pot of freshly roasted coffee. Enjoy!

A smaller world of coffee: The Berlin is your gateway to our coffee ecosystem, connecting you with exceptional growers around the world for a complete coffee experience.

From green beans to a full pot, the Berlin brews the freshest coffee with the push of a button. Your perfect cup awaits. Simply select your beans, pour in water, and enjoy.

Iconic design: Stand-out enough to spark conversation, subtle enough to look at home in your kitchen, the Berlin has class.

Roasted in the moment, the Berlin delivers flavor like you've never tasted before. Savor nuanced, sumptuous coffee so smooth, you might even skip the cream.

The Bonaverde Coffee Concierge

The Bonaverde Coffee Concierge is our digital product that lets users navigate the world of coffee. A specialized coffee bot built on Facebook messenger, the Concierge is designed to bring you the perfect cup. Roast your own beans, schedule your next roast and share with the Coffee Changer community--all from your smart phone.

It can be accessed through concierge.bonaverde.com

As coffee beans have unique characteristics, they require specific roasting profiles. The Coffee Concierge is your guide, matching roasting profiles to specific coffees. You can also choose specific commands such as "Roast Only" or "Grind And Brew."

CONTROL

Control your Bonaverde Berlin from anywhere, just remember to add water and beans before you leave the house! No need to be near your machine, simply visit the Coffee Concierge and "make coffee" or "schedule" your perfect cup.

SCHEDULE COFFEE

Want to wake up to the smell of freshly roasted coffee? Choose "Schedule Coffee," pick your preferred roast and set the time and day. You can schedule several times at once and it's easy to cancel if your plans change.

EDUCATION

Learn more about the origins of the coffees you are consuming. The Bonaverde Coffee Concierge offers great videos and photos from the coffee farms where your beans have been harvested.

COMMUNITY

In the course of 2018, we will be launching features that allow you to create your own roasting profiles and share them with fellow coffee lovers.

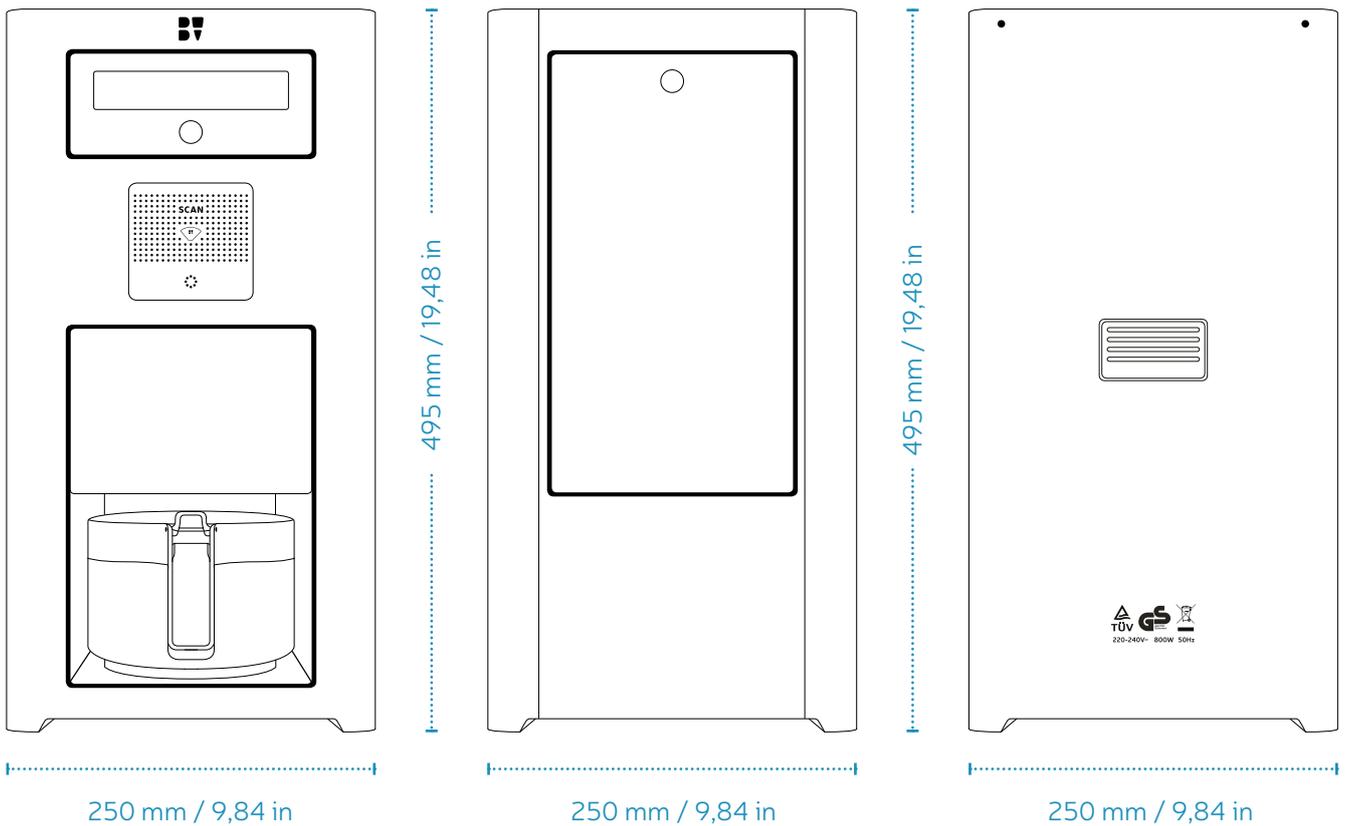

Two colors

The machine is available in white-green and in silver-black with more colors to be introduced soon.
